

Math 323-05: Calculus III
Spring 2020
MWF 1:10 – 2:40 in room LH-4

Instructor: Jonathan Williams

Office: WH-208

Email: jwilliams@math.binghamton.edu

Grades, syllabus, etc: <https://mycourses.binghamton.edu>

Unified syllabus: https://www2.math.binghamton.edu/p/calculus/math_323/start

Information omitted from this syllabus, such as the lecture schedule and grade weights, can be found on the unified syllabus.

Office Hours: Mon 10-11 and Tues 1-3 in WH-208. Alternatively, email me a few times you can meet, along with a good reason you can't come to the regular hours, and I will choose one.

Homework and quizzes (20% of your grade): Homework is on WebAssign, worth 5% of your grade. Each Monday there will be a quiz over all assignments meeting two criteria:

- The assignment has not yet had a quiz, and
- The assignment was due before the quiz.

When students ask what the quiz will cover, I refer them to the syllabus.

Midterm exams: February 17, March 20 and April 22 in class.

Final exam: This exam is cumulative. Time and place TBA; see <http://bannertools.binghamton.edu/exams>.

Students tend to ask if I will curve grades, and the answer is no. I take the above grades and calculate a raw average out of 100. I then sort the resulting list of numbers from lowest to highest and choose a range for each letter grade. These ranges will not be more stringent than the standard 90-80-70-60 scale.
