Definite Integrals

Video

Section 4.2 in Stewart's Calculus.

Preclass Learning Objectives:

- Definite integrals calculate the area under a function over an interval.
- Riemann Sums.
- Properties of definite integrals.

Classroom Slides PDF

Classroom Slides TEX

The Fundamental Theorem of Calculus

Section 4.3 in Stewart's Calculus.

Classroom Slides PDF

Classroom Slides TEX

Indefinite Integrals

Section 4.4 in Stewart's Calculus.

Preclass Learning Objectives:

- An indefinite integral of a function is its general antiderivative.
- The definite integral of a rate of change is the net change.

Classroom Slides PDF

Classroom Slides TEX

Integration with Substitution

Section 4.5 in Stewart's Calculus.

Preclass Learning Objectives:

Substitution is the rule for integration which

corresponds to the chain rule for differentiation.

• Introduction to integrating with substitution.

Classroom Slides PDF

Classroom Slides TEX

Area

Section 5.1 in Stewart's Calculus.

Preclass Learning Objectives:

 Total area between functions f and g is calculated by integrating the absolute value of the difference of f and g.

Classroom Slides PDF

Classroom Slides TEX

Volume

Section 5.2/5.3 in Stewart's Calculus.

Preclass Learning Objectives:

- Formula for calculating volume using cylindrical shells.
- Differences between the washer and shell methods.

Classroom Slides PDF

Classroom Slides TEX

The Average Value of a Function

Section 5.5 in Stewart's Calculus.

Preclass Learning Objectives:

Average Value Formula.
