

### Peter Hilton

Distinguished Professor Emeritus  
DPhil, 1949, Oxford University  
At Binghamton since 1982

**Areas of Interest:** Algebraic  
topology, algebra

Summary of research interests

**E-mail:** , peter@math.binghamton.edu

**Fax:** (607) 777-2450

#### ▪ Ph. D. Students:

- Joanna Su, Spring, 2000  
**Thesis:** Homotopy Theory of Modules
- Karl Lorensen, Spring, 1997  
**Thesis:** Local-Global Principles for Nilpotent Group Extensions
- Heather Ries, Spring, 1992  
**Thesis:** Torsionfree Abelian Groups Which Are Almost Finitely-Generated
- Christopher Schuck, Fall, 1992  
**Thesis:** Some Contributions to the Study of Nilpotent Groups
- Robert R. Militello, 1991  
**Thesis:** On the Cayley-Hamilton Property in Groups
