FALL 1999

Monday, September 27:

Speaker: Dan Siilaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
I: Matroids

Abstract

Monday, October 4:

Speaker: Dan Siilaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
II: Graphs

Abstract

Monday, October 11:

No meeting

Monday, October 18:

Speaker: Dan Siilaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
III: Biased graphs

Abstract

Monday, October 25:

Speaker: Dan Siilaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
IV

Abstract

Monday, November 1:

Speaker: Dan Siilaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
V

Abstract

Monday, November 8:

Speaker: Dan Sliiaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
VI

Abstract

Thursday, November 18 (*Note special day and times!*)

Speaker: Jack Graver (Syracuse University)

Two talks!

Title (joint with Geometry/Topology Seminar, 2:50 in room TBA): Rigidity Theory and Matroids

Title (Colloquium, 4:30 in SW-323): You May Rely on the Reliability Polynomial for Much More Than You Might Expect

Monday, November 22:

Speaker: Dan Sliiaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
VII

This lecture will concern Dan's own contributions.

Abstract

Monday, November 29:

Speaker: Dan Sliiaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
VIII

This lecture will continue the discussion of Dan's contributions.

Abstract

Monday, December 6:

Room: LN-2205 (the new seminar room). **Note room change!**

Speaker: Dan Sliiaty (Binghamton)

Title: Orientations of biased graphs and their matroids, with applications to hyperplane arrangements and surfaces.
IX

This lecture will continue to outline Dan's own contributions. Many details including results and proofs will await for next semester.
