

## Data Science Seminar

---

The Data Science Seminar is evolved from the former [Statistical Machine Learning Seminar](#) which covered topics in statistical theory that was important for machine learning research as well as development and applications of machine learning techniques in interdisciplinary research. The scope of the Data Science Seminar has been broadened to facilitate dialogue among different communities in the data science circle.

It is listed as course MATH 568.

**Location:** Whitney 100E ([See the directions to the department](#))

**Time:** Tuesday 11:45 am -12:45 pm

**Organizer:** [Sanjeena Dang](#)

See also the [Statistics Seminar](#).

An internal [Machine Learning Working Group](#) meeting is held when no seminar talk is scheduled.

See [Previous talks in the Data Science Seminar](#) and even earlier talks.
