About Us

Basic information

- **Address, email, phone, fax**
- **Directions to the department**
- **Administrative Personnel**
- **Chairs of certain committees**
- **The department's by-laws**
- **Internal department documents** (for department computers only)

For our academic programs, activities, or whether we are hiring, see the links at the left.

History

- An interview with former chairman, Jim Kent
- About the late Almir Olimpio Alves
- About the late Peter Hilton
- About the annual lecture in memory of Peter Hilton

Who are we?

- We are a group of mathematicians and statisticians.
  - The research interests of our faculty members can be divided into five general areas: Algebra, Analysis, Combinatorics, Statistics and Topology/Geometry. Read the [Research areas](http://www2.math.binghamton.edu/) page for interests of each faculty member. Most of us have interests in more than one area.
- We are educators.
- We are joined by many hard-working and talented undergraduate and graduate students.
