2025/11/08 16:49 1/1 The Placement Test Schedule

The Placement Test Schedule

For Enrollment in Calculus I

The placement test will be given to students intending to take Math 224, Math 223, or Math 220 as indicated below:

This test must be taken and passed by all students planning to take these courses. There are NO exceptions. A placement test taken and passed at Binghamton within the past year before your first day of class will still count. It does not have to be taken again.

You can take the Placement Exam after you register for your course. However, you must pass the test to be allowed to actually take the course.

The box below gives the next round of scheduling for the Placement Test for students intending to take Math 224, Math 223, or Math 220.

The Placement Exam is offered online for free during the first week of December and January 12-23. Registration to take it is now available online, just click on the link below to register yourself.

There are two versions of the test: One, for students intending to take Math 220 and the other for students intending to take Math 223 or Math 224. Please make sure to take the test designated for the course you will be taking. You can inform the proctor at your appointment which exam you need to take.

Click here to make an appointment to take the Placement Exam.

DO NOT LEAVE THIS EXAM TO THE LAST MINUTE.

You will receive your score as soon as you submit your answers. If you fail the test you can take it again on a different day. Since the test can be repeated, nothing is lost by taking it at the earliest possible time.
