

**Statistics Seminar**  
Department of Mathematical Sciences

<b>DATE:</b>	Thursday, March 30, 2017
<b>TIME:</b>	1.15p-2.15p
<b>LOCATION:</b>	WH 100E
<b>SPEAKER:</b>	Ruiqi Liu, Candidacy Exam
<b>TITLE:</b>	Panel data and the binary choice model with group structure

**Abstract**

Panel data is an important data class in economics. It consists of both time series and cross-sectional data. In this presentation, I will first discuss some classic results of non-linear models for panel data. Then I will present some recent work on panel data with group structure. Finally, I will talk about the model I am currently working on, namely, the binary choice model with group structure.
