Statistics Seminar Department of Mathematics and Statistics

• February 8

Speaker: Zhongyuan Zhao (Binghamton University)

Title: Analytic Formulae for the Minimax Characteristics of the Generalized

Shiryaev-Roberts Quickest Change-Point Detection Procedure under

Exponential Observations

Abstract

• February 15

Speaker: Wenshu Dai (Binghamton University)

Title: The mixture of logistic t multinomial models (continued)

<u>Abstract</u>

• February 22

Speaker: Bruce Phillips (Binghamton University)

Distributed Estimation of Principal Eigenspaces.

Abstract

• February 29

Speaker: Xinghai Zhang (Binghamton University)

Title: Semiparametric Proximal Causal Inference

<u>Abstract</u>

March 7

No seminar

• March 14

Speaker: Geran Zhao (Binghamton University)

Title: EDTER: Edge Detection with Transformer

Abstract

March 21

Speaker: Jingze Liu (Binghamton University)

Title: Continuous Treatment Effect Estimation via Generative Adversarial De-

confounding Abstract

March 28

Speaker: Baozhen Wang (Binghamton University)

Title: Conformal Meta-learners for Predictive Inference of Individual Treatment

Effects Abstract

- April 4

Speaker: Praveen Niranda (Binghamton University)

Title: Robust estimation for ordinary differential equation models

<u>Abstract</u>

Last update: 2024/08/14 15:04

- April 11

Speaker: Yangsheng Wang (Binghamton University)

Title: Regression trees for longitudinal data with baseline covariates

Abstract

- Apri 18

Speaker: Zengyan Zhang (Binghamton University)

Title: Computational modeling of cell migration in microfluidic channel

Abstract

- April 25

No seminar

■ May 2

Speaker: Zhou Wang (Binghamton University)

Title: Set-valued Classification and Conformal Prediction in Out-of-distribution

Detection and Bandit Feedback Settings

Abstract
