## **Grade Requirements**

- Any math course in which a student earns a grade of C- or less is *not* acceptable as a prerequisite for any other course offered by the Department of Mathematics and Statistics, unless stated otherwise in the course description.
- Any math course in which a student earns a grade of C- or less *cannot* be used to fulfill the requirements of the math major or minor.
- Math courses may only be repeated once to meet the above minimum grade requirements for the major. No course for the major may be taken more than twice. Students who fail to receive a grade of C or better after two attempts in a required major course will be dropped from the major. Withdrawals do not count towards the attempt limit. Students who are seniors may petition for an exception to this policy.
- A pass grade (P) does not count toward the major or minor unless the only grade available is Pass/Fail; in this case, consent of the Department is required.
- A student who has received credit for a course may not take one of its prerequisites for credit at a later time.
